Winter 2011-2012

Mid-Burke Express/New Trails – New High Speed Quad

Fact Sheet

The new “Mid Burke Express” lift, from Leitner-Poma North America, reaches the summit seven minutes faster than the existing Willoughby Quad. It gives skiers and riders faster access to the upper mountain’s terrain, making the entire mountain’s 2,011 feet of vertical accessible by high-speed quads.

The new trails and glades include: Upper Lift Line (intermediate), Rerun (expert), Upper Power Line (expert), Lower Power Line (expert) and Jester (a terrain park trail).

- Manufacturer: Leitner Poma
- Model: High Speed Quad
- Length: 5,900 ft
- Vertical: 1,583 ft
- Speed: 1000 ft/min

About Burke Mountain: Located in the heart of Vermont’s Northeast Kingdom, Burke, with over 260 acres of skiing and riding, has an elevation of 3267 ft., over 2011 ft. of vertical, and 50 natural trails including over 110 acres of glades. As the primary training and race facility to over 50 ski Olympians, Burke is home to Burke Mountain Academy, an internationally acclaimed ski- focused boarding school offering a college preparatory curriculum, sending many students to compete in the Olympics and other national and international competitions.
